

CS 321 – Software Engineering

Final - Project Peer Evaluations

Based on your assessment of how they performed, assign a grade (0 – 100) to each member of your team. Write a few sentences explaining your grade.

The focus should be on the overall performance while putting more weight on the later stages of the project.

You can also include N (for no grade and no comment).

Your assessments will remain confidential.

Note:

- Your grade for this assignment will be an average of the peer evaluation scores assigned by your project teammates. *Self-evaluations will be omitted from this computation.*
- For computation purposes, a neutral score of 50 will be assigned for any N (no grade and no comment) evaluation received.

Submission Instructions

The assignment should be submitted as a .pdf file before the due date. Make sure the name of the file includes the assignment number and your last name CS321-FinalProjectPeerEvaluations-<LastName>.

Alexia	90	Contributed to the project and completed the tasks assigned to her. While there were times when communication could have been more consistent, she remained involved and helped move the project forward.
Anosha	90	Completed assigned work and communicated well with the group. She contributed throughout the project and was more helpful during the later stages.
Aroub	95	Consistently showed strong commitment and teamwork throughout the project. As the leader, she communicated effectively, and played an important role in making sure the project stayed on track. Her contributions during the end were valuable.
Carolina	95	Consistently contributed her work and maintained excellent communication. She helped the team, took responsibility for her tasks, and had a role in the project's success, particularly toward the end.
Connor	90	Reliable contributor who completed his tasks and worked well with the team. He also could have communicated a bit more effectively but still gave meaningful contributions throughout the project.
